GEL-PAK OFFERS NEW WEBSITE TOOL FOR CUSTOMERS

HAYWARD, CA, AUGUST 12, 2008: Gel-Pak®, a division of Delphon Industries and leading manufacturer of Gel-coated carriers for device shipping, handling, and processing announced today the launch of its new web-based Device Calculator Tool. This tool allows customers to compute the number of their specific devices that can be loaded on a particular Gel-Pak carrier. This new option can be accessed via Gel-Pak's website www.gelpak.com.

This feature compliments the sites Product Selection Wizard (PSW), an interactive program that uses a series of targeted questions to recommend the ideal Gel-Pak carrier based on each customer's detailed application. "The Device Calculator will be a valuable tool for both new and existing customers allowing them to optimize the number of devices they can load on a Gel-Pak carrier based on device size and product type," says Darby Davis, Director of Worldwide Sales and Marketing.
